## Answers

Here are some keywords. Can you work out what the category heading should be for each column?

Category: Astronomy (520)	Category: Sport (796)	Category: Pets (636)	Category: Mammals – wild (599)
stars	netball	dogs	elephants
moons	rugby	cats	platypuses
planets	hockey	budgerigars	moose
sun	rounders	guinea pigs	hippopotamuses
galaxies	swimming	goldfish	hedgehogs
telescopes	football	white mice	foxes
comets	tennis	hamsters	chimpanzees

Once you know the category heading, see if you can find the Dewey number for that category using the subject index.
